

Round 'em up & Drop 'em off!

Antibiotics are effective against viruses, which cause colds, flu and most sore throats.

MYTH / **FACT**

Using antibiotics when they are not needed may cause some bacteria to become resistant to the antibiotic.

MYTH / **FACT**

Not finishing your antibiotic because you feel better may make you sick longer.

MYTH / **FACT**

Take part in the Antibiotic Roundup!

Receive a FREE gift and a chance to win 1 of 5 \$100 Meijer Gift Cards when you bring in your old and expired antibiotics to a Meijer pharmacy!

The CDC Foundation, Michigan Antibiotic Resistance Reduction (MARR) Coalition and Meijer have joined together to help fight the spread of antibiotic resistance in Michigan.

Check your fridge, medicine cabinets, and any other place where old or unused antibiotics may be stored, and bring them to your local Meijer store for disposal.

Families and entire communities feel the impact when disease-causing germs become resistant to antibiotics. Taking your antibiotic prescription exactly as prescribed is an important part of protecting our antibiotic lifeline.

Don't Miss Out!

Bring in your antibiotics as soon as possible! Meijer stores throughout the state will be accepting old or unused antibiotics for disposal starting

January 25, 2006 until April 25, 2006.
